Would you like to receive project updates?  Yes  No

What role does the airport play in your life?

I live under the downwind leg of 28-10. Every, approximately, 2 years or so I get scared by a helicopter flying over my house night and day at, I would guess, only 100' or 200ft. above and/or when I lose my patience over coming and going helicopter traffic. I report my concern over the above as well as the fact that there are many, many schools in the area and I worry about helicopter engine failures and vertical descent into a school building or school yard filled with children. Typically, for about 2 weeks departures+arrivals are, as prescribed by an FAA procedure I have seen, along Aero Dr. to/from a freeway but then return to bad practices.

What would you like to learn more about as part of the Montgomery-Gibbs Executive Airport Master Plan study?

I would like to see FAA action taken to implement firmly (again?) Aero Dr. departures and arrivals of helicopters at, say, a minimum of 500' (to stay below circuit altitude). I have no objection to helicopters departing straight toward an emergency situation but that, on return, follow the Aero Dr. route.

Remember, when helicopter engines fail the aircraft goes straight down with no option that a winged aircraft has to glide to a safer area to set down.

Please provide other comments below.

Both safety and noise levels are at stake in the above.

What role does the airport play in your life?

my F is a base for Airplanes I manage and charter

What would you like to learn more about as part of the Montgomery-Gibbs Executive Airport Master Plan study?

Please provide other comments below.

I would like to have the runway extended to facilitate use of the airport by more aircraft.
